EXPERIENCE

Full Stack Developer Intern **Pitchmatter** March 2026 – June 2026

- Designed and shipped 15 REST API endpoints across 3 modules (Matchmaking, Connections, Followers) and extended them for admin-side functionality.
- Built the Matchmaking module (7 endpoints) covering application workflows and investment/deal tracking. • Built the Connections (4 endpoints) and Followers (4 endpoints) modules to manage user relationships and networking features.
- Audited Zynk.ing and CAPShield for usability and functional issues; documented the Marketplace module end-to-end, including wireframes, API documentation, and a team presentation.
- Converted Figma designs into responsive, production-ready UI, including the Referral page, resolving cross-screen layout inconsistencies.

PROJECTS

RAG PDF Analyser **(Python, FastAPI, React.js, ChromaDB, Ollama, LLM)**

- Built an end-to-end RAG-based PDF chatbot using React, FastAPI, ChromaDB, and Ollama, enabling semantic document search and LLM-powered question answering.
- Implemented PDF text extraction, 500-character chunking with 50-character overlap, embedding generation with nomic-embed-text, and vector retrieval using ChromaDB.
- Improved answer reliability by adding filename/page metadata filtering, page-level source citations, and retrieval-distance checks to reduce unsupported answers.

Movie App **(React.js, TMDB API, REST APIs, Async Storage, Responsive Design)**

Live: react-movie-app-pied-pi.vercel.app · GitHub: sourasish423/react-movie-app

- Built a movie browsing platform on the TMDB REST API, handling 500+ paginated results with efficient data fetching.
- Implemented Async Storage for persistent favorites and optimized repeated API calls to reduce redundant network requests.
- Built a responsive, multi-screen component architecture with robust error handling, loading states, and data transformation for a smooth UX.

SKILLS

Frontend: **HTML**, **CSS**, **React.js**, Next.js, Tailwind CSS

Backend: **REST API Design**, **MongoDB**, Node.js, Express.js, FastAPI, Flask, JWT

Authentication **Languages:** **JavaScript**, **Python**, Java, SQL

AI/ML: **LLM Fundamentals**, RAG, NLP, Prompt Engineering, ChromaDB, Ollama ,**LLama hph**

Databases & Tools: **MySQL**, **Git**, **GitHub**, **Postman**, Docker, Linux, PostgreSQL, Render **Other:** Software

Development Life Cycle, Object-Oriented Programming, Good Communication Skills, Teamwork

EDUCATION

B.Tech

St. Thomas' College of Engineering and Technology

Class 12 (AISSCE)
